

# ZEN LINE

THE RESTYLING

An exciting design challenge: the restyling of the iconic **Zen Line**.

Redesigned by **Antonio Lanzillo & Partners**, the new Zen Line preserves its original constructive and stylistic philosophy, maintaining its essential style which is defined by balanced volumes and coordinated finishes, but, at the same time, it has been rethought in all its details.

A contemporary rack collection which is highly customizable in size and look, a technical furniture as we like to define it, because under a clean robe hides a performing soul, made of floating shelves and decoupling feet. We combined aesthetics and technology in order to adapt the new Zen to multiple contexts and ensuring the maximum performance of your HI-FI system.

Founded in 2001 by the multi-award winning architect designer Antonio Lanzillo, the design studio **Antonio Lanzillo &Parteners** has become an international creative agency that develops product, communication and strategy projects across multiple sectors.

The studio has a prestigious client portfolio such as Marc Sadler, Technogym and Rodolfo Dordoni, in addition to collaborations with important companies like Repower or Cucine Lube.

**DETAIL 1  
ISOLATION**

Top shelf completely decoupled by Torlon sphere for a perfect turntable and CD player's isolation

**DETAIL 2  
ADJUSTABLE FEET**

We focused on elegance without sacrificing performance. The Zen Line is presented with adjustable feet with Teflon decoupling disks to easily move the rack on all kind of floors.

**DETAIL 3  
CABLE MANAGEMENT**

In order to keep the electronics cables perfectly neat, we have added an intelligent integrated cable management system.
