

**Oracle Matrix SHD 120 Revision 2**

Built off of the Oracle SHD120 platform, the Oracle SHD120 Rev. 2 houses its networks inside of a CNC machined t6 billet aluminum enclosure to isolate and protect sympathetic vibrations from entering the internal network.

F.A.T. technology gives the listener the ability to tune up (or down) the number of Poles, offering the flexibility to listen to various qualities of recordings without being too critical. New to the SHD120 Rev. 2 is the addition of 2C3D technology, giving listeners the best in soundstage and realism in natural sounding textures and timbre.

**Oracle Matrix SHD 120 Rev. 2 Speaker Interface**

- 120 Poles of Articulation (*High Definition Mode*)
- 145 Poles of Articulation (*Super High Definition Mode*)
- 2C3D In/Out for tuning soundstage preference

SKU	DESCRIPTION	LENGTH
ORASMTRXSHD120.2S-08	Oracle Mtrix SHD 120 Rev.1	8 feet
ORASMTRXSHD120.2S-10	" "	10 feet
ORASMTRXSHD120.2S-12	" "	12 feet
ORASMTRXSHD120.2S-15	" "	15 feet

Additional lengths available in 5 ft increments: Consult Price Sheet.

2

**Oracle Matrix SHD 120 Rev. 2 Bi-Wired Speaker Interface**

- 124 Poles of Articulation (*High Definition Mode*)
- 149 Poles of Articulation (*Super High Definition Mode*)
- 2C3D In/Out for tuning soundstage preference
