

About StyleLine Audio Interfaces

Multipole Technology housed inside the RCA.

Multipole Technology housed inside the XLR.

The StyleLine Series of audio interfaces represents our ongoing effort to bring classic MIT performance to more affordable price points. Through advances in miniaturization, the StyleLine Series provides superior performance in an easy-to-install format that will fit into any user's lifestyle.

StyleLine SL 3 Interconnect—RCA

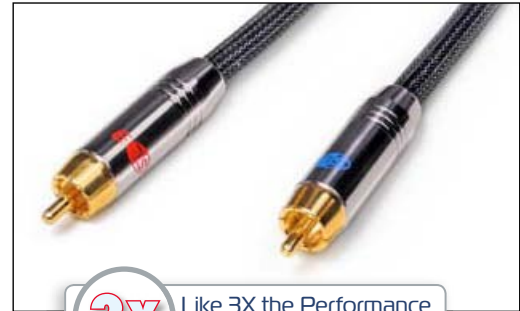

The plot below right is a conceptual illustration showing how Multipole technology works synergistically throughout the audio spectrum. Pole A provides an area of better bass, Pole B provides an area of better midrange, and Pole C provides an area of better highs. Together, they provide better bass, better midrange, and better highs — “like multiple cables in one!”™

Features & Benefits:

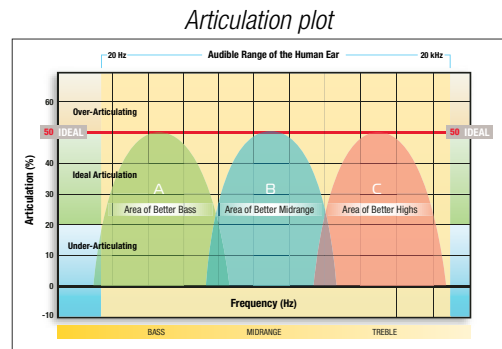

- **Exclusive Multipole™ Technology**—Three Poles of Articulation deliver MIT Cables' classic performance to your system.
- **Multi-gauge construction with 0.999999 pure copper conductors**—The purest materials deliver superior conductivity for improved performance.
- **Highest-quality polyethylene (P.E.) insulation**—Reduces non-linear dielectric-based distortions for excellent low level detail and superior sound.
- **Gold-plated RCAs**—Secure connections assure best signal transfer.
- **Robust dual shielding**—Provides superior noise rejection for improved low-level detail.

SKU	PRODUCT	LENGTH
SL3I-1	StyleLine 3 Interconnect	1 m (3.3 ft.)
SL3I-1.5	" " "	1.5 m (5 ft.)
SL3I-2	" " "	2 m (6.6 ft.)
SL3I-3	" " "	3 m (10 ft.)

Additional lengths available in 1 meter increments: Consult Price Sheet. 1/2 pairs available, packaged in bags.

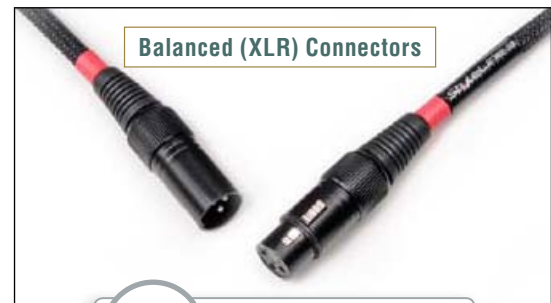

3X Like 3X the Performance of Just Cable!

StyleLine SL 3 Interconnect—Balanced XLR

SKU	PRODUCT	LENGTH
SL3XLR-1	StyleLine 3 Balanced Interconnect	1 m (3.3 ft.)
SL3XLR-1.5	" " "	1.5 m (5 ft.)
SL3XLR-2	" " "	2 m (6.6 ft.)
SL3XLR-3	" " "	3 m (10 ft.)

Additional lengths available in 1 meter increments: Consult Price Sheet. 1/2 pairs available, packaged in bags.

4X Like 4X the Performance of Just Cable!

Tip: Read about Multipole Technology on Page A1

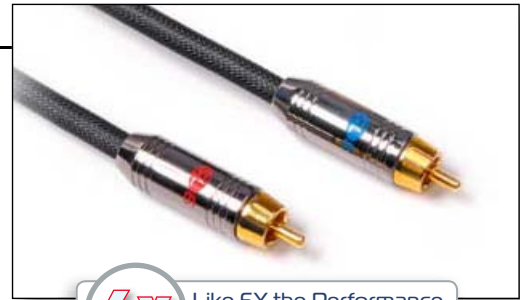

StyleLine SL 6 Interconnect—RCA

The plot below right is a conceptual illustration showing how Multipole technology works synergistically throughout the audio spectrum. Poles A & B provide an area of better bass, Poles C & D provide an area of better midrange, and Poles E & F provide an area of better highs. Together, they provide controlled bass, and smoother, more extended highs along with a lower noise floor —“like multiple cables in one!”™

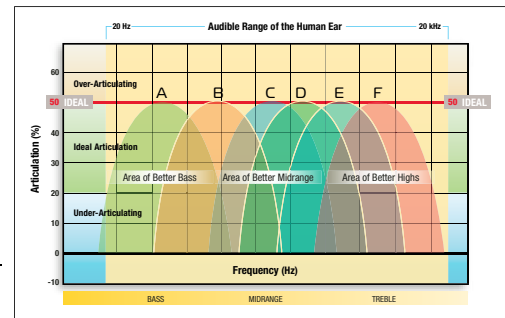

Features & Benefits:

- **Exclusive Multipole™ Technology**—Six Poles of Articulation deliver MIT Cables’ sophisticated performance to your system.
- **Multi-gauge construction with 0.999999 pure copper conductors**—The purest materials deliver superior conductivity for improved performance.
- **Highest-quality polyethylene (P.E.) insulation**—Reduces non-linear dielectric-based distortions for excellent low level detail and superior sound.
- **Gold-plated RCAs**—Secure connections assure best signal transfer.
- **Robust dual shielding**—Provides superior noise rejection for improved low-level detail.
- **Rugged overbraid**—Increases durability and cable life.

6X Like 6X the Performance of Just Cable!

StyleLine SL 8 Interconnect—RCA

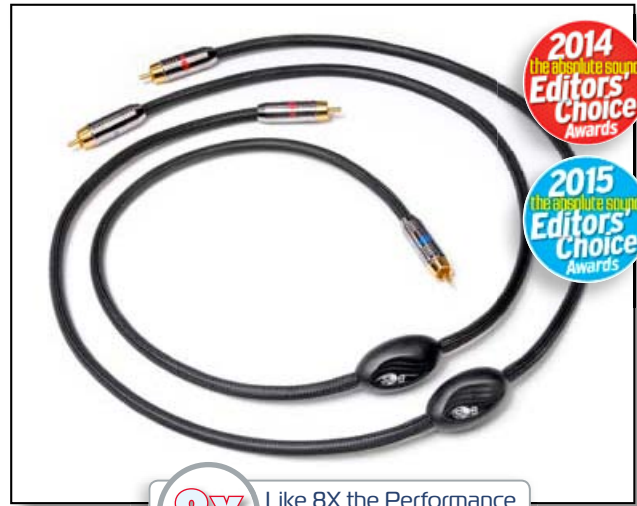

The plot below right is a conceptual illustration showing how Multipole technology works synergistically throughout the audio spectrum. Poles A, B, and C provide an area of better bass, Poles D and E provide an area of better midrange, and Poles F, G, and H provide an area of better highs. Together, they provide deeper bass, enhanced image and focus, along with an overall greater clarity—"like multiple cables in one!"™

Features & Benefits:

- **Exclusive Multipole™ Technology**—Eight Poles of Articulation deliver MIT Cables' sophisticated performance to your system.
- **Multi-gauge construction with 0.999999 pure copper conductors**—The purest materials deliver superior conductivity for improved performance.
- **Highest-quality polyethylene (P.E.) insulation**—Reduces non-linear dielectric-based distortions for excellent low level detail and superior sound.
- **Gold-plated RCAs**—Secure connections assure best signal transfer.
- **Robust dual shielding**—Provides superior noise rejection for improved low-level detail.
- **Rugged overbroad**—Increases durability and cable life.
