## 1 | Connecting – Speakers

Connect the amplifier OUTPUT terminals to the loudspeaker terminals (positive [+] to red and negative [-] to black).

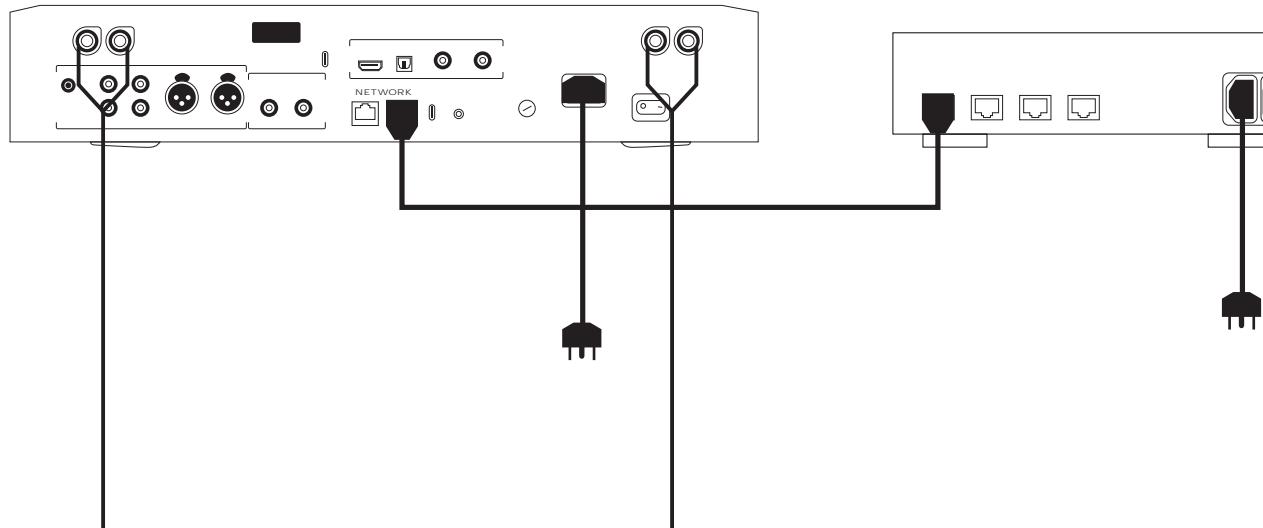

## 2 | Connecting – Power

Connect the supplied power cable between the device and an electrical outlet.

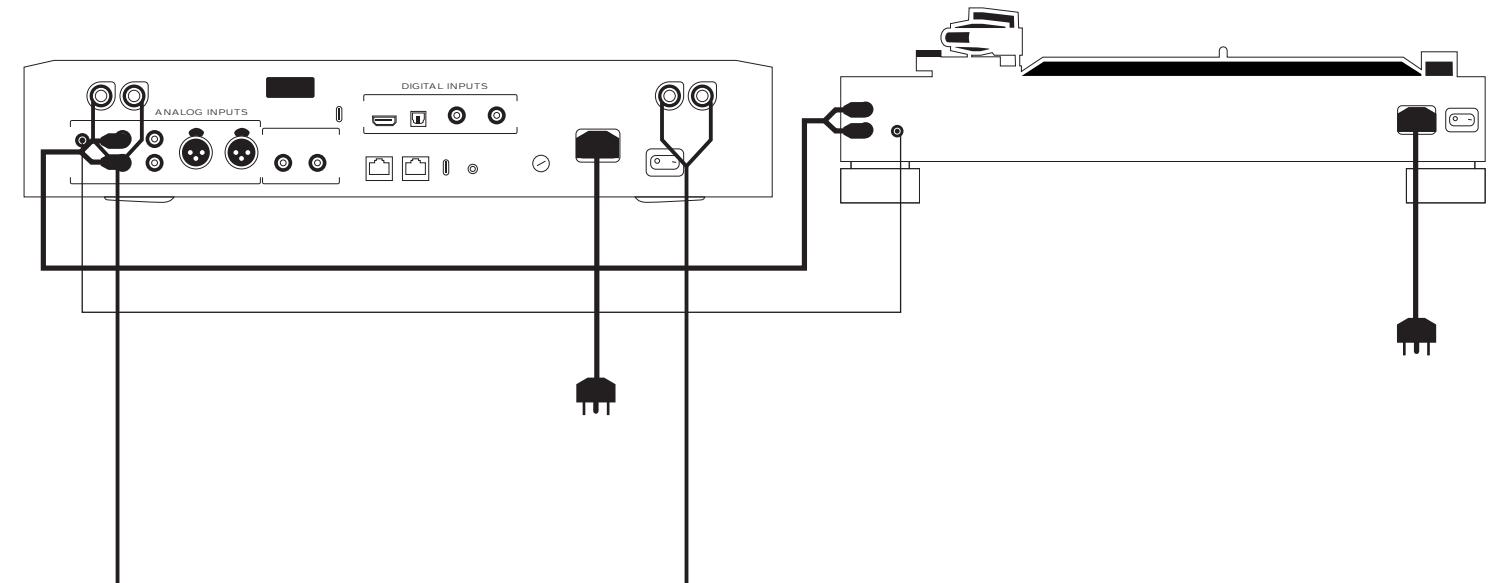

### 3 | Connecting – Network

Connect an ethernet cable between the device and a network router or switch.  
Alternative wireless configuration: see Step 7.

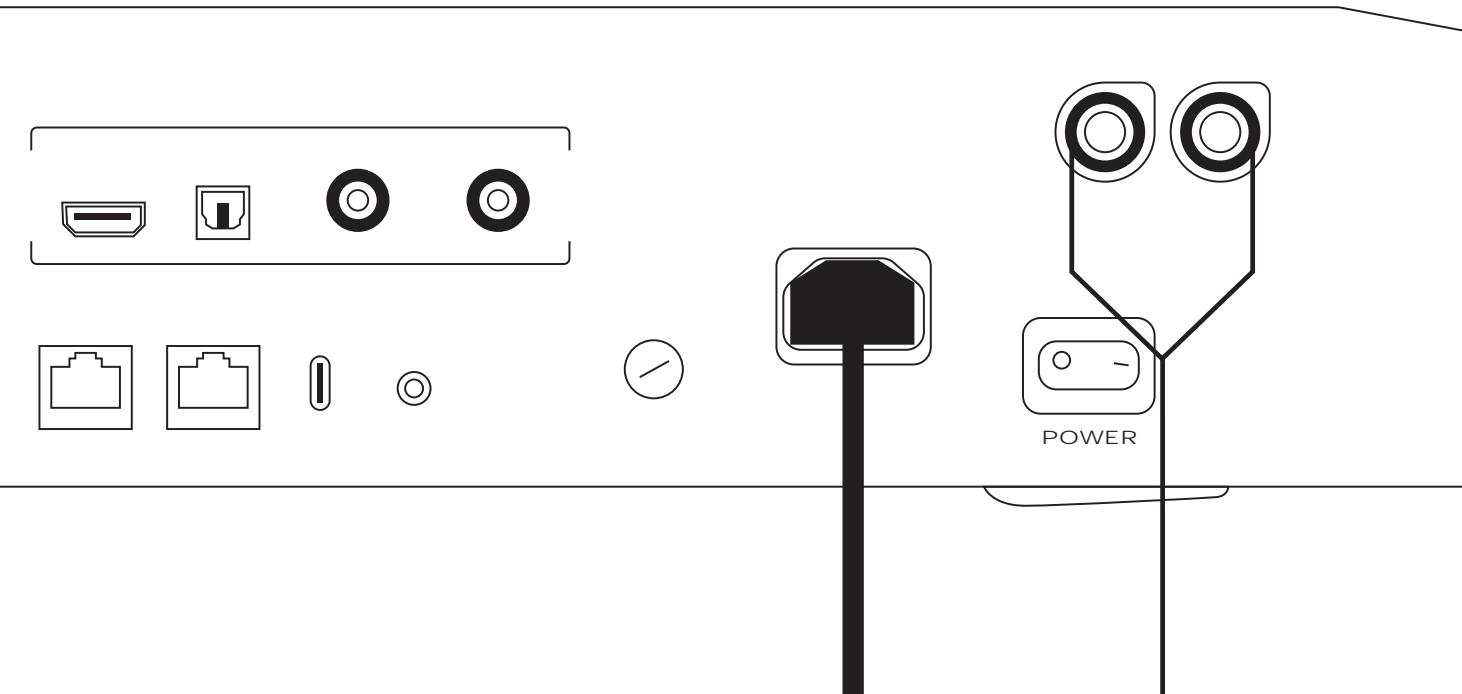

### 4 | Connecting – Sources (optional)

Connect up to three analog sources to the ANALOG INPUTS and up to four digital sources to the DIGITAL INPUTS using the appropriate interconnect cables for each device.

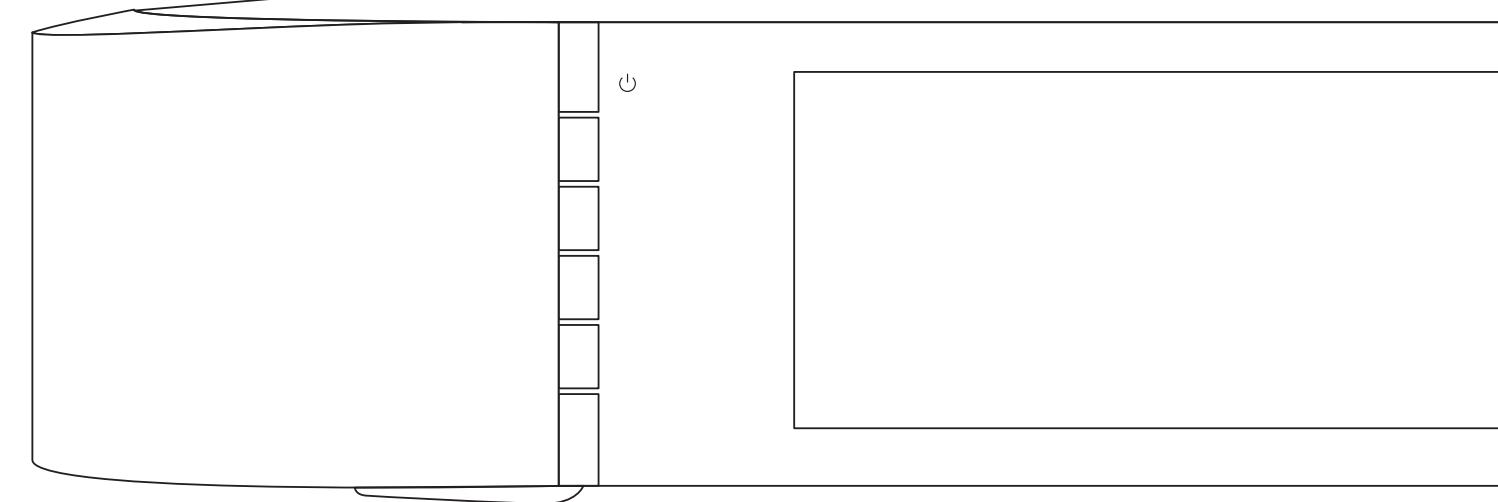

## 5 | Starting – Power

Toggle the POWER rocker switch to On [-].

## 6 | Starting – Standby

After the indicator light stops pulsating, press the  $\odot$  button.

## 7 | Wi-Fi – Configuring

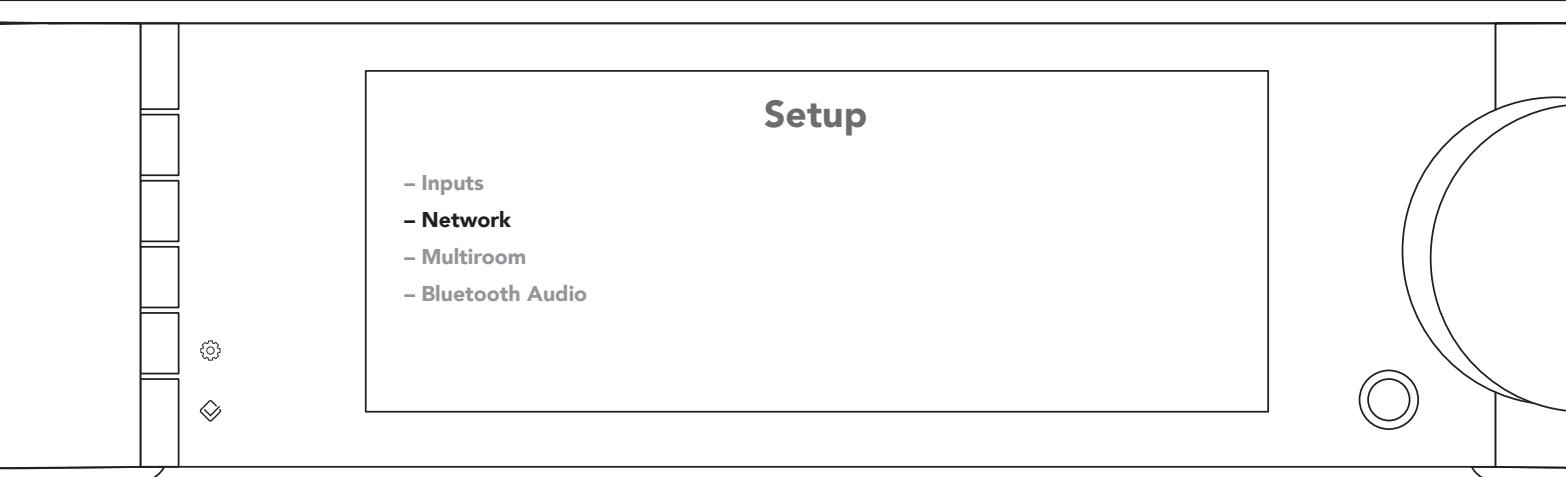

Alternative wireless configuration. If you completed step 3, you can skip to step 9.

Press the  button.

Using the volume knob to scroll and  button to select...

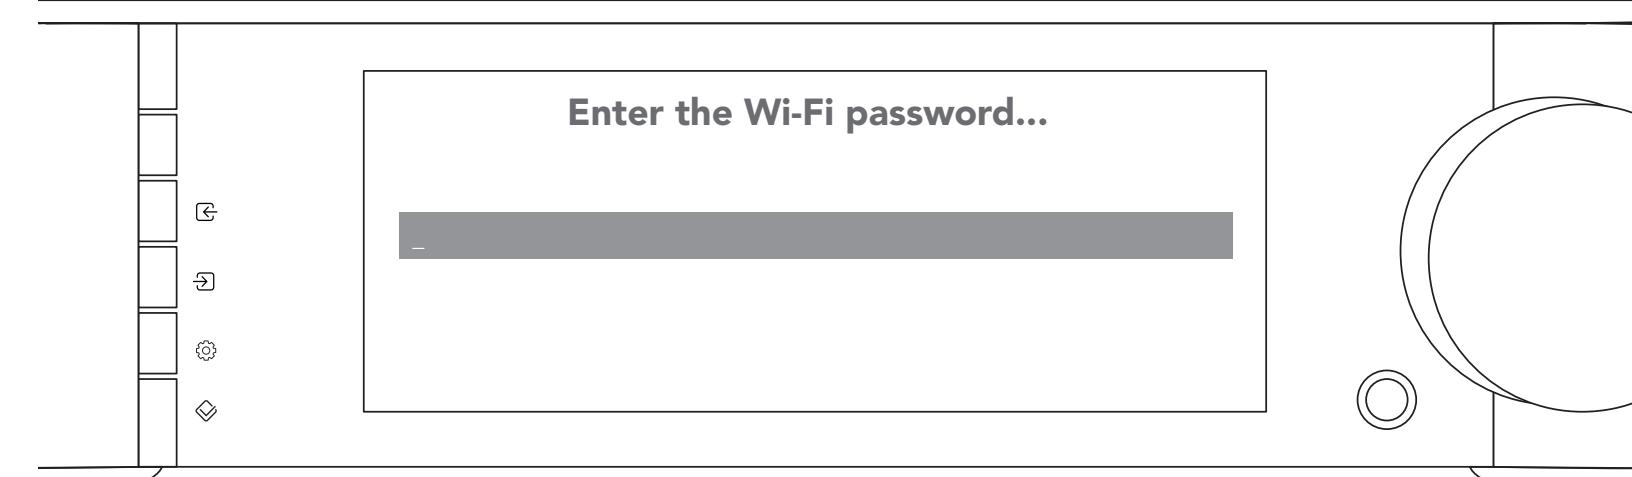

1. Go to: Network -> Configuration -> Wi-Fi Parameters -> Automatic

2. Select the name of the Wi-Fi (SSID) from the list, or Manual if it does not appear.

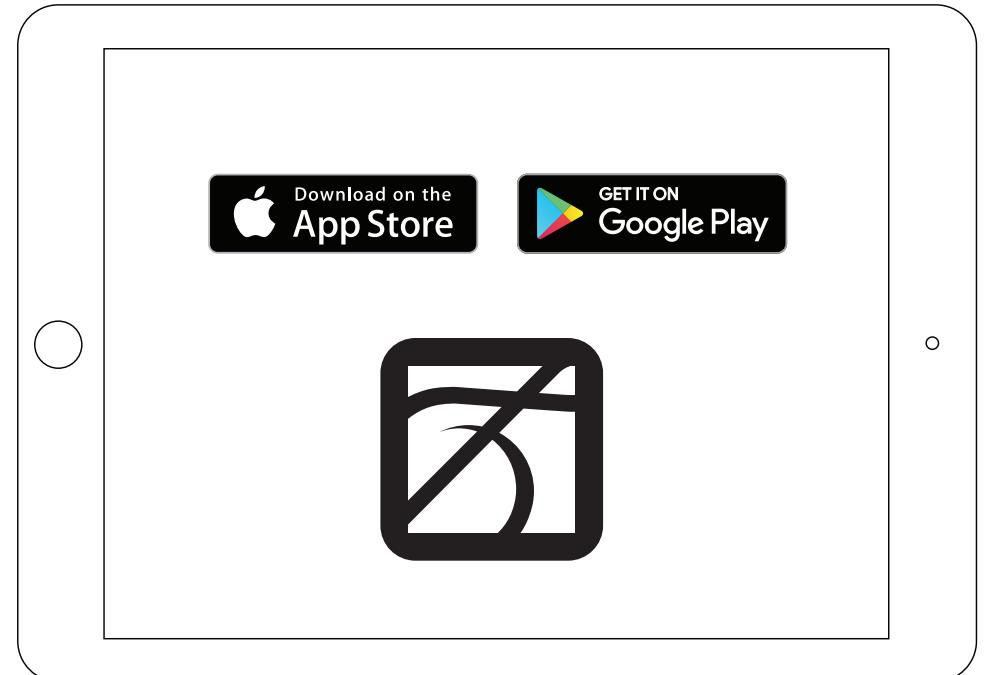

## 8 | Wi-Fi – Password

Using the volume knob to scroll through characters, the / buttons to move the cursor, and the  button to complete, enter the Wi-Fi password (Security Key).

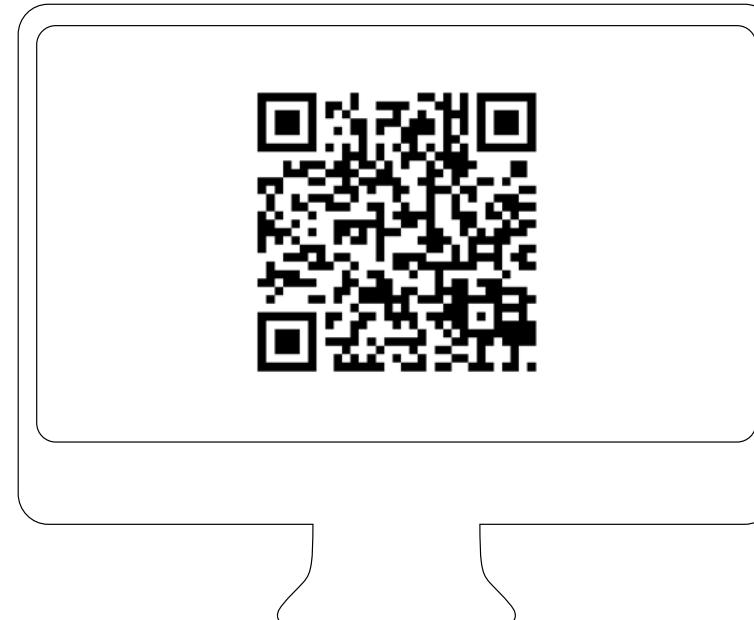

## 9 | Controlling – MiND Controller

Download the MOON MiND Controller app.
