EISA AWARD CITATION

CONFIDENTIAL/EMBARGOED UNTIL AUGUST 24th, 2026

OFFICIAL EISA Award citation for:

EISA Premium Integrated Amplifier 2026-2027
MOON 371

The elegantly crafted MOON 371 is a superb introduction to the brand's new Compass Collection, bringing premium all-in-one performance to a wider audience. Designed and manufactured in Canada around MOON's acclaimed MDCA class-AB amplifier topology and MHP power supply, the 371 delivers 100Wpc into 8 ohms and 200Wpc into 4 ohms, allowing it to drive a wide range of loudspeakers with confidence and refinement. There's also a headphone output, while extensive analogue and digital connectivity includes HDMI ARC, an MM/MC phono stage, and MiND2 network streaming with support for AirPlay, Bluetooth, Roon, Spotify Connect, Tidal Connect and Qobuz Connect. Backed by an industry-leading 10-year warranty and finished to the luxurious standard expected of the Canadian brand, the MOON 371 combines exceptional sound quality, versatility, and long-term value in one elegant package.
